Reporting period: 29 August – 21 September 2026

Great news — your Google Ads campaign is actively bringing new enquiries to 7 Days Ready. Below is a simple, no-jargon look at how your ads have performed over the last few weeks.

Your Ads at a Glance

5,876	468	40
Times your ad was seen online	People who clicked through to your site	New enquiries / leads generated

In simple terms: for every **100 people** who clicked on your ad, around **9 of them** got in touch — a strong result for a driving school.

What's Working Well

- Your ads are getting noticed — almost **8 in every 100 people** who see your ad go on to click it, which is a healthy click rate for the driving school industry.
- Enquiries are coming in at a low cost — each new lead is costing you around **£4.54**, which is excellent value.
- Mobile is your strongest channel — the vast majority of clicks are coming from people searching on their phones, right when they're looking for a local driving school.
- Your account has a healthy optimisation score of **68.8%**, meaning the campaign is well set up and running efficiently.

Overall, your Google Ads account is healthy and delivering real enquiries for the business.

The One Opportunity: Your Daily Budget

Your ads are performing well, but your current daily budget is limiting how many people you can reach each day. You're currently spending around **£7.50 per day** — this is quite low, so your ads can only capture a small share of the people searching for driving lessons in your area.

Current daily budget	≈ £7.50 / day
Recommended daily budget	£12.00 / day
Approx. monthly investment	≈ £360 / month

Raising the daily budget gives your ads more room to show up throughout the day, instead of running out early — which means more clicks, more enquiries, and more new students finding 7 Days Ready, without changing anything else about how the campaign is set up.

Next Step

We recommend increasing the daily budget to £12/day for the next reporting period so we can keep this positive momentum going. No other changes are needed right now — the campaign itself is set up well and performing strongly.
