linkedin.com/in/alikhan-tech • webistic.co

PROFESSIONAL PROFILE

Junior Software Engineer and Co-Founder at Webistic Marketing Solutions. Practical experience across software development, AI automation, and Google Ads — focused on building and improving real business systems.

PROFESSIONAL EXPERIENCE

Junior Software Engineer & Co-Founder

Webistic Marketing Solutions | 2025–Present

- Contribute to the development and improvement of websites and web-based experiences for business clients.
- Coordinate development work, review implementation, test functionality, and support project delivery with developers and AI-assisted coding tools.
- Build practical AI automation workflows, including chatbots, WhatsApp assistants, calling agents, and integrations connecting business processes.
- Work on Google Ads campaigns and support digital growth activities, with a focus on lead generation and measurable business objectives.

SELECTED PROJECT EXPERIENCE

Website development — Contributed to four business websites: 7daysready.co.uk, webistic.co, parkstoneminibuses.com, and onyxgentlemansaloon.com.

Google Ads — Ran Google Ads for a driving-school client in Birmingham, UK.

Website performance review — Worked on a performance audit for SevenDaysReady.co.uk, a website built by Webistic.

AI calling & workflow automation — Built several calling-agent projects and worked with AI assistants and workflow automation for business use cases.
